

SonaChron

Lathem

The **SonaChron** is a single circuit signaling device which can be used as a bell ringer or on/off controller. It is capable of retaining up to 1440 separate events plus a floating lunch and break schedule which can be activated with a single key on the keypad.

A **liquid crystal display** on the front of the unit displays the current time and date, and programming prompts.

Automatic adjustment for **daylight savings time** is also provided. The time keeping ability is dependent on the power source frequency.

During power failures, a rechargeable **battery backup** retains programming information for up to 10 days.

The unit can provide a 110VAC signal output for bells or horns, or a switch closure to operate with some PA systems.

The SonaChron provides ONLY ONE (1) signal circuit.

The SonaChron does NOT run secondary clocks.
