

Watchmens Clock

The Guardsman provides unique, unbroken, mechanical supervision of your guards on weekends, during holidays and extended plant closings, as well as on weeknights. Unlike most other watchclocks, the Guardsman operates on a continuous roll of tape for up to 120 hours if necessary, eliminating the necessity of changing the paper every 24 hours.

The guard visits a series of stations in a predetermined order. At each station he inserts a recording key. This registers the station number that is embossed on the time-tape in the clock. When a supervisor checks the tape, he can tell at a glance how faithfully the guard performed his duties. The record is unalterable, tamper-proof, and alibi-proof.

Please note that the black numbers shown on the tape are for example only. The actual tape displays a raised, embossed, white station number that is cut into the time-tape.
