

Newman

Detex

Watchmens Clock

The Newman provides unique, unbroken, mechanical supervision of your guards on weekends, during holidays and extended plant closings, as well as on weeknights. The Newman uses a 24 hour paper dial that must be changed daily.

The guard visits a series of stations in a predetermined order. At each station he inserts a recording key. This registers the station number that is embossed on the time-dial in the clock. When a supervisor checks the tape, he can tell at a glance how faithfully the guard performed his duties. The record is unalterable, tamper-proof, and alibi-proof.

Please note that the black numbers shown on the dial are for example only. The actual dial displays a raised, embossed, white station number that is cut into the time-dial.
