

The **CompuTime 101 Time and Attendance System** is an integrated software / hardware combination that allows companies total control over their employees' time and attendance data. The system offers unparalleled performance, with the flexibility and functionality required for today's business environment.

The **XLS 21** offers the best "bang for the buck" for pc based time keeping systems. Employees can punch with a PIN number or with a durable proximity badge card or keychain fob (badges and fobs sold separately). Multiple communication methods, including TCP/IP Ethernet (6' cable included), RS232 serial (cable sold separately), and USB flash drive (drive and cable sold separately), make the XLS 21 a versatile clock, easily implemented in a wide variety of environments. The included CompuTime101 software offers easy time keeping management.

CompuTime automatically consolidates, calculates and processes your information for reporting and communicating directly to your outside payroll service or in-house payroll system. In addition it will generate all kinds of management reports upon which informed, timely decisions can be made.
